

xio®

xio® | xio® move - workstation system

Flexible and intelligent

xio® ■

**xio®** – The modular furniture stands for a reduced formal language and was designed by the design office Putz & Friends. Here the current need for simple and clear design in an intelligent structure was implemented. The elegant design and the floating table top convey clarity and elegance. The highlight of the system lies in the innovative design: The series adapts to the size, adjusts itself and is simple changeable. **xio®** equips highly flexibly any office situation and so it is an intelligent decision. One for all.

Designer |  
Wolfgang Putz

xio®

### Striking optics

With **xio®** you create a unique environment, your employees and colleagues will feel and appreciate it.

The variation range offers opportunities for flexible furnishing for every level of the company: This is **xio®**. Attractive furniture grant the look to your facilities, which represents your Corporate Identity. **xio®** connects your individuality with the demand of an intelligent modular furniture.

Wankel-profile

Rectangular-profile

Round tube-profile

## Individuality and expression

The changeability of **xio®** will be appreciated by your Facility Management.

**xio®** supports individual room- and system design, expansion or quick change of remits. The universal use of different frame designs, frame colours, table surfaces and attachment elements offers huge flexibility. Subsequently, select from each of the three frame profiles that one, which suits to the formal language of your company and use the possibilities of a large choice of colours.

**Wired** | The large volume cable tray can be folded down on both sides and provides sufficient space.

*„Charisma and elegance: The striking optics of my choice!“*

**Individuality** | *The choice of material and colour makes every workstation unique.*

**Connected** | *Table connections for simple fixation.*

Functional design and a positive image count very much. Nevertheless it is important not forgetting the Facility Management. For that reason the xio® system is modular and adapts to any architecture environment.

## design@work

xio® - The ideal single workstation adapts to the user and his needs. Glass panels protect elegantly from interference: So you remain undisturbed and concentrated.

**Height adjustment |**  
*At the push of a button  
quickly adjusted from the  
height 620 to 850 mm.*

**Individuality |**  
*The 12 mm thick solid  
core plate emphasizes the  
floating character of the  
desktop.*

### **Reasonable combined**

Creative in the selection: The **xio®** workstation depends on the needs of the human and his demands. From back office to management level, with **xio®** you can create the suitable system. You have full freedom to combine. One thing is for sure: The minimalist design and the variety of features delight employees with small or large demands. High quality panels of glass create a moody private sphere and a modern office environment

with feel-good factor. This is how we work today.

### **Easily adjusted**

Practical details ensure the necessary flexibility. The height adjustment is controlled very easily by touching of a button. So the ergonomically correct working position for each employee is guaranteed. Forms and functions of **xio®** harmonize technically and visually. Together they are a fantastic team!

**Folding down |**  
*The cabletray opens on full width by pressing a button  
and provides easy access for rapid electrification.*

**Spacious |**  
*Lot of storage space for sockets, cables, chargers and  
system connections in high-volume cable tray.*

**Sliding desktop |**  
*The desktop can be unlocked and moved forward by  
pushing of a button. So the cable tray remains easily  
accessible also in head position.*

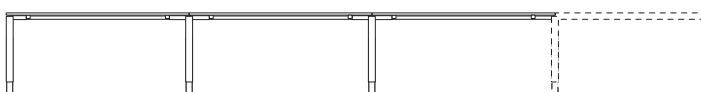

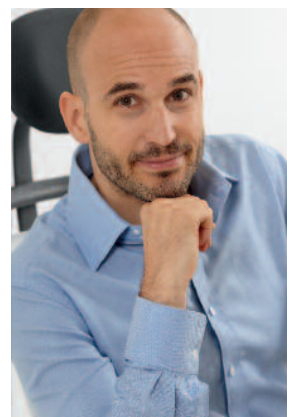

As row linking or block position: Our team-solutions create efficient groups and functional workstations. The visual protection here adopts a double function and is also a high-efficient acoustic screen. That way concentrated working becomes a great pleasure in the smallest space.

# team work

## Together motivated

Team workstations optimize space costs. Good, if a workstation system allows this installation simply and solidly. xio® is the perfect partner for vivid companies.

**Practical** | A special side panel provides easy row linking.

**Clever design** |  
The double capture of the  
frame side.

**Lots of accessories |**  
*Individually equipping, the  
 fully usable third level with  
 the organization profile.*

### **Concentrated work – with xio®.**

It's always the others, that make noise. So motivation and productivity need well-shielded areas. Our visual- and acoustic protection walls, in combination with effective acoustic carcass furniture, create feel-good places. This absorbs acoustic disturbances and provides at the same time comfortable privacy shield. If disturbing factors are reduced, the work will be easier and more efficient.

Here we come together, unknowns here will be made customers and partners. Those who make decisions and conclude contracts, hold informal meetings and discussions, need a place which supports this.

# Communication in proper style

The **xio®** workstation system adapts with ease, offers space and a lot of legroom. With the help of the linking element, the tables could be linked almost endlessly in series. Also expensive conference systems will be simply created with **xio®**. The selection of materials as decor or natural wood, metal or chrome as well as the selected frame geometry, create the desired room structure and atmosphere.

**Puristic** | *The function specifies the equipment.*

Conferring on a high level |  
At places where people feel  
good, innovative ideas and new  
projects are developed.

Establishing structures | Straight-line modules design flexible structures, which  
are height-adjustable and free in the grouping.

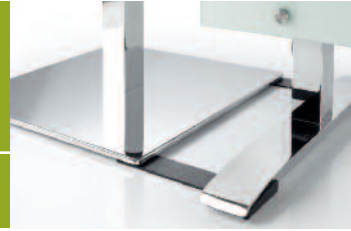

Mobile storage |  
The mobile catering-trolley  
makes room for diverse  
catering equipment.

Sophisticated in each height

Elegantly connected |  
Spacer takes care of  
security

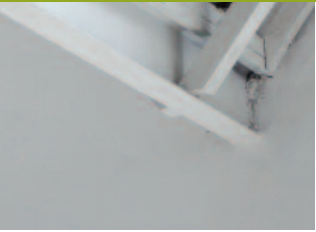

## xio® move ■

Puristic in design - timeless in appearance, representative and intelligent: real wool, chrome and satined glass – combined with a electromotive height adjustment. The working height will be adapted easily and quickly to the required working situation by pushing of a button. The sit-stand dynamic receives the energy

of the user and improves the well-being – even during long working days. The technics of xio® move enable the constant change between sitting and standing. The side tables for short discussions are available in many designs and keep always the right distance with the help of spacers.

The setting of our working life is changing. Smart top performers know: Height-flexible desk systems minimize meeting longitudes, motivate and stimulate the productivity, without strain.

Status |  
Noble wood and chrome:  
The perfect combination  
for the representative  
management area.

# move it

On what level are you working?

Dynamics instead of strain: Easy adjustable sit/stand workstations ensure movement at work. Natural postures and variety entail healthy employees – even when you get busy.

**The working world in movement** | The xio® move R is a real all-rounder. The height adjustment with automatic snap in can be easily lifted or lowered. Only in seconds and first of all very simple – even by a single person.

*Your environment experiences a new dimension | The capability increase with the dynamics – because modern means more than just the design.*

### **Movement for everybody.**

Those who have already experienced the dynamic working, do not want to live without it! Anymore with **xio®** move variety is fun: In seconds the working height can be adapted. So you increase the quality of work with easiness. Existing standard-workstations can be upgraded with height adjustable side tables. The flexible **xio®** move system injects sit-stand-dynamics in every office.

The design-runner |  
Stable and solid.

*Which is simple, will be used. |  
By pushing of a button in a seconds in the selected favorite position. The hand-switch LUD stores up to 4 working heights. ( Image below, optionally available.)*

### **The versions complete each others**

Dynamic working promotes actively the health preservation, creates enthusiasm and motivates employees at all levels. Whether by raster adjustment or crank adjustment, via pneumatic gas lift or electro-motive frame version: All requirements of a dynamic workstation will be covered. **xio®** move is more than simply clever!

xio® - Easier would be simplistic.

*CPU-holder*

*Printer-holder*

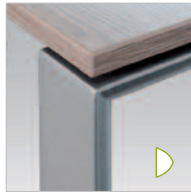

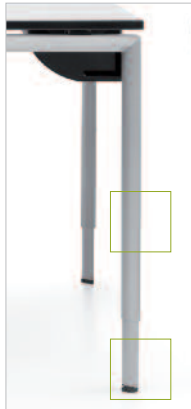

*Metal screen*

*Glass screen*

xio® cable tray |  
Stains relief and cable  
guide rolled into one:  
That's clever!

**Table height adjustment** | Tool-less

**Frame variants** | Design variety with three profiles

### Tool-less adjustable.

xio® adjusts itself. All frame variants are tool-less height adjustable. Simply by pushing a button the height is adjustable from 620 to 850 mm via raster. Another fine adjustment is possible by means of integrated jack screws.

Complementary elements such as monitor limbs, screens, CPU-holders, and much more can be easily fitted. The external frame legs are always flush with the end of desktop.

**Cable tray** | Double-sided hinged at the push of a button

**Vertical cable guide** | Magnetic

**Sliding desktop** | Via hand-switch triggered (optional)

**Row linking** | By means of a special frame side part

xio® move - Versatile and future-proof

xio® move - Life is movement.

*xio®move P/R/K  
Simply telescoped  
mechanical*

*xio®move M  
Doubly telescoped  
electromotive*

*xio®move M  
More columns electro-  
motive*

**xio® move** | Versatile height adjustment possibilities: mechanical, pneumatic or electromotive.

### xio® move P/R/K

The height adjustment range at the pneumatic variant is activated by gas lift from 680 to 1180 mm (P), as raster (R) from 680 to 920 mm or crank adjustment (K) from 620 to 850 mm.

### xio® move M

The electromotive frame variant is height adjustable from 620 to 1250 mm. The program concept offers many expandabilities: for example modesty panels, screen panels, CPU-holders and much more.

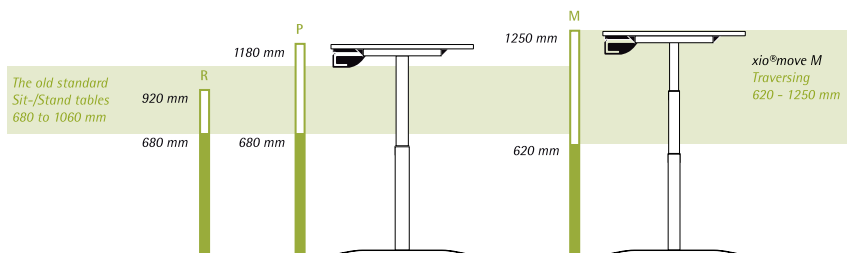

**xio® cable tray** | 1 design, 2 possibilities

**Expandable** | CPU-holder, modesty panel and much more

### xio® move side tables

The **xio® move** side table is available in different models. With fixed height (750 mm) or height adjustable: Raster adjustment (680 to 920 mm height), pneumatic gliding via gas lift (680 to 1180 mm) or with round-tube-frame also electromotive via hand-switch "LU" (680 to 1110 mm).

**Future-proof** | xio® move complies with the requirements of the DIN EN 527-1.

**xio® side table** | Fixed height or height-adjustable.
